Table of contents

Preliminary remarks.....	I
List of abbreviations	I
List of publications	III
Conferences	IV
Declaration of contribution as co-author.....	V
Chapter 1.....	1
General Introduction	1
1 Fungal infections in the vineyard	1
2 Copper in winemaking	3
3 Influence of polyphenoloxidases on wine color	7
4 Glutathione in winemaking.....	10
5 Alternative antioxidative agents and techniques in winemaking.....	18
6 Aims of the thesis	20
Chapter 2.....	31
Influence of glutathione on yeast fermentation efficiency under copper stress... 31	
1 Introduction.....	32
2 Materials and methods	33
3 Results and discussion.....	39
Chapter 3.....	55
Oxidation of wine polyphenols by secretomes of wild <i>Botrytis cinerea</i> strains from white and red grape varieties and determination of their specific laccase activity.....	55
1 Introduction.....	56
2 Materials and methods	57
3 Results and discussion.....	62

Chapter 4.....	81
Concluding remarks.....	81
1 Interactions of copper and glutathione during fermentation.....	81
2 Impact of laccases from different <i>Botrytis cinerea</i> isolates on wine phenolic compounds	87
Summary.....	97
Zusammenfassung.....	99
Acknowledgement.....	103
Curriculum Vitae.....	105
