Contents

Preface **i**

1 Fundamentals of grain boundaries and triple junctions **1**
1.1 Grain boundaries 1
1.1.1 Terminology 1
1.1.2 Atomic structure of grain boundaries 6
1.1.3 Kinetics of grain boundaries 12
1.2 Grain boundary systems with triple junction 23
1.2.1 Terminology 23
1.2.2 Atomic structure of triple junctions 24
1.2.3 Kinetics of triple junctions 27
1.3 Grain growth - Impact of grain boundary and triple junction kinetics 32
1.3.1 Von Neumann-Mullins relation 32
1.3.2 Effect of triple junction drag on the Von Neumann-Mullins relation 32

2 Experimental setup **35**
2.1 Methods of investigation 35
2.1.1 Discontinuous Method 36
2.1.2 Continuous Method 36
2.2 Laser-powered heating facility 39
2.2.1 Previous in-situ heating facilities 39
2.2.2 Fundamental new approach 41
2.2.3 Construction of a laser-powered heating facility 42
2.2.4 Potential area of application 47
2.3 Experimental procedure 52

2.3.1 Bi- and tricrystal fabrication 52
2.3.2 Experimental investigation and evaluation 54

3 Kinetics of connected grain boundaries 59
3.1 Kinetics of connected <100> tilt grain boundaries 60
3.1.1 Experimental results 60
3.1.2 Discussion 70
3.1.3 Summary 75
3.2 Impact of a twist component on <111> tilt boundaries 79
3.2.1 Experimental Results 79
3.2.2 Discussion 86
3.2.3 Summary 89

4 Faceting and kinetic behavior of SAGBs 91
4.1 GB anisotropy - fundamentals and previous studies 91
4.1.1 Dependency of the grain boundary free energy on boundary inclination - the Wulff-plot 95
4.1.2 Roughening Transition 98
4.2 Experimental results on <100> tilt grain boundaries 102
4.3 Wulff-plot of <100> tilt grain boundaries - an MS-study . . . 112
4.3.1 Simulation method at zero Kelvin 113
4.3.2 Computation of grain boundary free energy at elevated temperatures 117
4.3.3 Simulation results - <100> tilt grain boundaries . . . 118
4.4 Discussion 123
4.5 Experimental results on <111> tilt grain boundaries 128
4.6 MS-study on <111> tilt grain boundaries 138
4.7 Discussion 144
4.8 Summary 147
4.9 Microstructure evolution - 2D-vertex model 149
4.9.1 Results - 2D-vertex model 151
4.9.2 Discussion 160
4.10 Summary 161

5 Summary and Outlook 163

Bibliography 169

Appendix 179
