TABLE OF CONTENTS

1	INTRODUCTION	1
1.1	Background and problem statement	1
1.2	Objectives of the study	3
1.3	Significance of the study	3
1.4	Organization of the Thesis	3
2	LITERATURE REVIEW	5
2.1	Ecological consequences of changes in water situation in Fergana valley	5
2.2	Agriculture and water management in Fergana region, Uzbekistan	17
2.2.1	Agricultural land use and crop yield	17
2.2.2	Agricultural water use	24
2.2.3	Collector-drainage water	31
2.3	Water and salt balance studies	35
2.4	Nitrogen in soil-plant-water systems	43
2.5	Field level hydrological, agronomic and water quality models	46
2.5.1	EPIC model	46
2.5.2	BUDGET model	47
2.5.3	UPFLOW model	48
2.5.4	RZWQM model	48
2.5.5	ISAREG model	49
2.5.6	DSSAT model	50
2.5.7	DRAINMOD model	50
2.5.8	Model selection	54
3	STUDY REGION	55
3.1	Geographical location	55
3.2	Climatic conditions	57
3.3	Soils	59
4	MATERIALS AND METHODS	60
4.1	Site characteristics	60
4.1.1	Akbarabad site	60
4.1.2	Azizbek site	63
4.2	Agronomical measurements	66
4.2.1	Akbarabad site	66
4.2.2	Azizbek site	69
4.3	Water measurements and sampling	71

4.3.1	Irrigation water.....	72
4.3.2	Subsurface drainage water	73
4.3.3	Groundwater	74
4.3.4	Collector-drainage water.....	74
4.3.5	Rain water	74
4.4	Soil sampling.....	75
4.4.1	Field level soil sampling for agrochemical analysis	75
4.4.2	Soil sampling for textural, agrochemical and hydraulic analysis	75
4.4.3	Model ROSETTA	76
4.4.4	Soil sampling and soil water content measurement	77
4.4.5	Infiltration measurement	78
4.5	Water balance	78
4.5.1	Total water balance	78
4.5.2	Calculation of reference and multi-crop evapotranspiration.....	80
4.5.3	Aeration zone water balance	82
4.5.4	Model BUDGET	83
4.5.5	Estimation of water upward movement	90
4.6	Nitrogen balance.....	92
4.6.1	Amount of N in applied fertilizer.....	93
4.6.2	Crop N uptake	93
4.6.3	Soil N dynamics	93
4.7	DRAINMOD model.....	94
4.7.1	Description of the model.....	94
4.7.2	Model input parameters	96
5	RESULTS AND DISCUSSIONS.....	102
5.1	Quantity and quality of the studied waters.....	102
5.2	Physical and agrochemical properties of soils	110
5.2.1	Characteristics of the soil profiles.....	110
5.2.2	Agrochemical soil properties	113
5.3	Total water and salt balance	114
5.3.1	Water balance.....	114
5.3.2	Salt balance	115
5.4	Water, salt and nitrogen balances in the aeration zone	117
5.4.1	Soil water balance	117
5.4.2	Soil salt balance	122

5.4.3	Nitrogen balance	125
5.5	Model BUDGET	126
5.5.1	Soil moisture content simulations	126
5.5.2	Cotton and wheat yield simulations	128
5.5.3	Sensitivity analysis.....	130
5.5.4	Actual crop evapotranspiration (ETa).....	131
5.5.5	Development of dual crop coefficient (Kc)	133
5.5.6	Estimation of the deep percolation (DP).....	137
5.6	Estimation of the capillary rise.....	140
5.7	Model DRAINMOD.....	145
5.7.1	Simulation of groundwater level (GWL).....	145
5.7.2	Simulation of drainage discharge.....	150
6	CONCLUSIONS AND FURTHER RESEARCH NEEDS	155
6.1	General findings	155
6.2	Specific findings.....	156
6.3	Policy implications and further research needs.....	161
	REFERENCES.....	166
	ANNEXES	182
	ACKNOWLEDGEMENTS.....	191
