Contents

1	Introduction to steel	1
2	Fundamental	5
2.1	Crystallography of Fe-Mn steel	5
2.2	Fundamentals of plastic deformation	6
2.2.1	Dislocation slip	6
2.2.2	Intrinsic and extrinsic stacking faults	8
2.2.2.1	Crystallography of intrinsic and extrinsic stacking faults	8
2.2.2.2	Generation of stacking faults based on dislocation theory	8
2.2.2.3	Thermodynamic model of intrinsic stacking fault energy	10
2.2.2.4	Impact of temperature and composition on stacking fault energy .	11
2.2.3	Deformation twinning	12
2.2.3.1	Crystallography of twinning	12
2.2.3.2	Mechanisms of twinning	14
2.2.4	Deformation induced ϵ -martensite transformation	15
2.2.4.1	Characteristic of general martensite transformation	15
2.2.4.2	Effect of alloying elements on martensitic stability	16
2.2.4.3	Transformation during deformation	17
2.2.4.4	Mechanisms of ϵ -martensite transformation	18
2.2.5	Shear banding	19
2.3	Deformation texture	20
2.3.1	Crystallographic orientation	20
2.3.2	Effect of stacking fault energy on deformation texture	22
2.3.3	Theories of deformation texture development	23
2.3.4	Relationship between deformation mechanisms and texture	25
2.4	Recrystallization	26
2.4.1	Definition	26
2.4.2	Recrystallization kinetics_ the JMAK model	26
2.4.3	Recrystallization texture	29
2.4.4	Recrystallization texture in low SFE copper based alloys	29
2.4.5	Recrystallization texture in austenitic stainless steel	30
3	Experimental procedure	33
3.1	Chemical composition and Stacking fault energy (SFE)	33
3.2	Processing	34
3.2.1	Sample fabrication	34
3.2.2	Sample preparation	36
3.3	Microstructure characterization	38
3.3.1	Optical microscopy	38

3.3.2	Electron backscatter diffraction (EBSD).....	39
3.3.3	Transmission electron microscopy (TEM).....	39
3.4	Texture measurements.....	40
3.4.1	Macrotexture measurements by X-ray diffraction	40
3.4.2	Microtexture by EBSD.....	42
3.5	Nanoindentation	43
3.6	Dilatometry.....	43
4	Microstructure and texture evolution during cold rolling	45
4.1	Cold rolling behavior of a Fe-21.6Mn-0.38C TRIP steel	45
4.1.1	Initial state	45
4.1.2	Evolution of microstructure during cold rolling	46
4.1.3	Hardness of austenite and ϵ -martensite	50
4.1.4	Texture evolution during cold rolling	50
4.1.5	Discussion	52
4.2	Cold rolling behavior of a Fe-23.2Mn-0.57C TWIP steel	54
4.2.1	Initial state	54
4.2.2	Microstructure evolution during cold rolling	55
4.2.3	Texture evolution during cold rolling	58
4.2.4	Discussion	59
4.3	Impact of carbon content on microstructure evolution	61
4.3.1	Initial state	61
4.3.2	Microstructure evolution	63
4.3.3	Discussion	64
4.4	Conclusions	65
4.4.1	Cold rolling behavior of Fe-21.6Mn-0.38C TRIP steel	65
4.4.2	Cold rolling behavior of Fe-23.2Mn-0.57C TWIP steel	66
4.4.3	Impact of carbon content on microstructure evolution	66
5	Transformation and reversion of ϵ-martensite in a Fe-21.6Mn-0.38C alloy .	67
5.1	Variant selection during transformation on rolling	67
5.2	Reverse transformation to austenite upon annealing.....	68
5.3	Discussion	72
5.3.1	Orientation correlation between austenite and ϵ -martensite	72
5.3.2	Annealing effects on ϵ -martensite.....	73
5.4	Conclusions	74
6	Recrystallization kinetics and microstructure evolution during annealing....	75
6.1	Recrystallization kinetics and microstructure evolution during annealing of Fe-21.6Mn-0.38C TRIP steel	75
6.1.1	Initial state	75
6.1.2	Recrystallization kinetics	77
6.1.3	Nucleus density and grain boundary migration rate.....	78
6.1.4	Texture evolution	80
6.1.5	Nucleation	82
6.1.6	Microstructure during recrystallization.....	85
6.1.7	Impact of orientation on recrystallization kinetics.....	88
6.1.8	Discussion	89
6.1.8.1	Recrystallization kinetics	89
6.1.8.2	Decrease of grain boundary migration rate during recrystallization	90

6.1.8.3	Nucleation	93
6.1.8.4	Annealing texture	94
6.2	Recrystallization kinetics and microstructure evolution during annealing of Fe-23.2Mn-0.57C TWIP steel	94
6.2.1	Initial state	94
6.2.2	Recrystallization kinetics	96
6.2.3	Grain boundary migration rate	97
6.2.4	Texture evolution	98
6.2.5	Discussion	100
6.2.5.1	Recrystallization kinetics	100
6.2.5.2	Comparison with Fe-21.6C-0.38C TRIP steel	101
6.3	Impact of chemical composition on recrystallization kinetics	102
6.3.1	Recrystallization kinetics	102
6.3.2	Phase evolution	104
6.3.3	Discussion	104
6.4	Impact of deformation strain on recrystallization kinetics and microstructure	105
6.4.1	Recrystallization kinetics	105
6.4.2	Microstructure evolution	106
6.4.3	Discussion	110
6.5	Conclusions	110
6.5.1	Experimental procedure	110
6.5.2	Recrystallization kinetics and microstructure evolution during annealing of an Fe-21.6Mn-0.38C TRIP steel	111
6.5.3	Recrystallization kinetics and microstructure evolution during annealing in Fe-23.2Mn-0.57C TWIP steel	111
6.5.4	Impact of chemical composition on recrystallization kinetics	112
6.5.5	Impact of deformation strain on recrystallization kinetics and microstructure	112
7	General conclusions	113
7.1	Deformation behavior	113
7.2	Recrystallization behavior	114
8	References	117
	Abstract	122
	Curriculum Vitae	125
